# What is «Suit»?

Suit is our HR management web app that aims to simplify the process of finding and hiring employees.
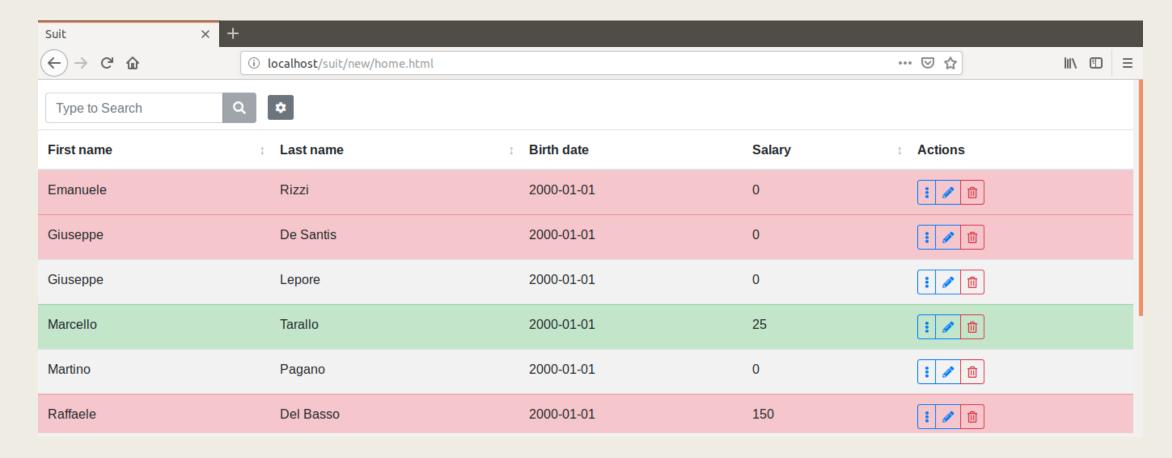

How is it made?

Front-end

APACHE

Back-end

How does it work?

The software has a top section which contains the search bar and the filter panel, and the main section which shows the candidates in a table.
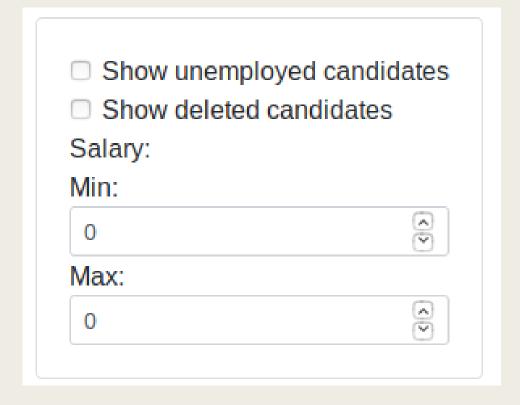

Search and filters • Search bar

The search bar allows you to search for a candidate by first name and last name using the incremental search method *(case insensitive)*.

| First name	Last name	Birth date	Salary	Actions
Marcello	Tarallo	2000-01-01	25	
Roberto	Clemente	2000-01-01	0	
Simone	Cacciapaglia	2000-01-01	25	

Search and filters • Filters

The following panel allows you to apply and combine filters for a more detailed search.

Rows and candidates

 Rejected or hired candidate

 Not deleted and not employed candidate

 Employed candidate

Roberto	Clemente	2000-01-01	0	
Simone	Cacciapaglia	2000-01-01	0	
Simone	Verna	2000-01-01	0	

Action list • Details

This button allows you to see all the candidate information.

Giuseppe	De Santis	2000-01-01	0	⋮ ✏ 🗑
Giuseppe	Lepore	2000-01-01	0	⋮ ✏ 🗑

Full name: Giuseppe Lepore
Birth date: 2000-01-01
Employed: No
Salary: € 0

The row expands and shows the following information:

- Full name;
- Birth date;
- Whether he/her is employed or not;
- Salary.

Coming soon:
- Contacts;
- Notes.

Action list • Candidate modification

This button lets you edit the candidate information.

In phase of implementation

Action list • Candidate deletion

This button lets you delete the candidate. It will still be possible to see the deleted candidates through the filter panel.

Delete candidate   ✕

Are you sure?

Cancel   OK

In phase of implementation

Conclusions

Our software has the goal to help the company with the hiring process.

Coming features:

- *Add, edit and remove a candidate;*

- *Log-in system;*

- *New filters.*

The app might be updated in the future to allow to manage all the employees becoming a more general tool for the company.
